

SDN CAMPUS NETWORK

SECURITY & PERFORMANCE ASSESSMENT REPORT

Report ID	SDN-CAMPUS-001
Generated	11-08-2026 14:39:39
System	SDN Campus Network Monitoring System
Assessment	Network Performance & Security

1. Network Performance Metrics

Metric	Current Value	Assessment
Throughput	74 Mbps	Normal
Latency	35 ms	Normal
Packet Loss	3.8 %	Monitored
Active Connections	128	Active

2. Network Link Utilization

Network Link	Utilization	Status
S1 → S2	85 %	CONGESTED
S1 → S3	30 %	NORMAL
S2 → S3	56 %	MODERATE

3. Security & Congestion Assessment

ATTENTION REQUIRED: High utilization has been detected on the primary network path.

Recommended Path: S1 → S3

Recommendation: Traffic should be redirected through the lower-congestion path.

4. System Information

Parameter	Description
-----------	-------------

Monitoring	Real-Time SDN Network Telemetry
Traffic Management	Dynamic QoS and Load Balancing
Network Architecture	Software Defined Networking
Monitoring Frequency	Continuous

This report was automatically generated by the SDN Campus Network Security Monitoring System.
